Experience

HealthPartners, Bloomington, MN   July 2013 – September 2014
Front-end Web Developer (contract)

- Lead front-end developer for several enterprise web applications on HealthPartners.com
- Create multiple custom Bootstrap themes and use pre-processors to enhance functionality and efficiency
- Create hand-coded, unit-tested JavaScript that consumes multiple APIs and web services in one interface
- Utilize emerging technologies such as AngularJS when creating components, and responsive design when re-styling portals
- Constantly work on improving front-end Grunt build process to benefit entire web team
- Collaborate with other developers, designers, UX, and business owners in an Agile development environment

Digi International, Minnetonka, MN   May 2010 – July 2013
Applications Developer, July 2012 – July 2013

- Coded object-oriented JavaScript by hand, and created a seamless UX with jQuery and Bootstrap
- Wrote several custom back-end features in Java
- Worked closely with clients throughout project lifecycle to ensure a collaborative and iterative process
- Created detailed mockups of custom applications to win large clients' business

Web Designer, May 2010 – July 2012

- Coded and designed front-end features using HTML5, CSS3, and jQuery on Digi.com
- Administrated global eCommerce platform
- Utilized several CMSs including WordPress to perform content management
- Shot, edited, and published company videos and product photography
